

**Features**

- ▶ 2 piece wooden feathering oars
- ▶ removable floating seat
- ▶ double action hand pump
- ▶ robust Halkey Roberts valves
- ▶ transom protection plate
- ▶ internal auto bailing drain
- ▶ service kit
- ▶ storage bag
- ▶ VALMEX® PVC

**Shearwater 260 Airfloor**  
High volume foldaway tender

The new Shearwater Airfloor is designed for a larger payload and is easily packed down, yet doesn't sacrifice performance thanks to its inflatable false floor with pre-shaped keel.

The popular Shearwater range has larger diameter tubes and are built tough in New Zealand for extreme South Pacific conditions. The new Airfloor model features a drop stitch inflatable floor that is rigid and durable, but lightweight and wont damage your yacht or launch.

Two heat-welded air chambers, rigid cones, and rub strake from bow to stern make for a dry, comfortable and safe ride. Southern Pacific quality is Kiwi Made.

**NZL\***

Made by Kiwis for Southern Pacific conditions based on our first-hand experience. Trust the brand that we build for you and your family with pride.
