

Specifications

The all-new Club 490E by Southern Pacific will set a new standard in electric boating. The Club is one of the most popular coach boats in the Southern Hemisphere and its efficient variable deadrise hull pairs perfectly with the ZeroJet 30 kW electric jet system. The boat can be configured to suit the coach boat, tender and commercial markets. The electric jet propulsion and 22 kWh of batteries as standard enable the boat to provide safe shallow water operation and up to 70 nm of range. Its thermally welded tubes and robust aluminium hull combine to create a durable and rugged RIB that's designed to last. With virtually no maintenance and no petrol to worry about, the Club 490E will set a new benchmark in electric boating.

SPECIFICATIONS

STANDARD SPECS :

Length External:	4.9 m
Beam External:	2.0 m
Dry Weight:	412 kg
Payload:	627 kg
Hull Deadrise:	12.5° aft
Propulsion:	30 kW ZeroJet
Batteries:	22 kWh Semi-Solid State Lithium

RANGE :

(1 person)

Slow Cruise:	3 knots	80 nm
Fast Cruise:	14 knots	30 nm
Top Speed:	23 knots	17 nm

CHARGING :
