

SeekR

Legendary Performance for Every User

The SeekR is a high quality chase boat for the leisure market as well as Yacht clubs and coaches. Especially designed for NZ and South Pacific conditions, with its high shear bow design it provides a dry ride allowing it to cut through all seaways. The Hypalon-covered "never-go-flat" D-shaped foam fenders give extra protection and stability. The addition of D-shaped tubes has increased the internal volume of the boat while allowing for a seat/shelf for sitting on or stepping from one vessel to another. A full rear bench seat is standard as well a ski arch for towing other watercraft. The hull deck and internal structure are entirely CNC molded.

Features

- Designed by naval architect, Rob Shaw
- Hypalon-covered "never-go-flat" D-tubes
- Duckbill (Scupper)
- Under-floor fuel tank
- 65 L fuel tank
- 500 GPH bilge pump
- Deck scupper
- LED Navigation lights
- Carbon fibre keel capping on bow
- Gelcoat finish with non-skid flooring
- Anchor locker
- Wichard lifting point
- Sleek GRP console
- Aft bench seat with dry storage
- Rear-mounting platform
- Hand pump
- USB charge ports
- Tow poles
